

Team,

In the event you are in need of N95 Fit Mask testing due to contact with a COVID 19 positive patient and/or conducting aerosolizing procedures with a COVID 19 presumptive or positive patient, please see anyone of the following to assist you with that testing:

Amy Rember, Infection Prevention and Control Practitioner / 918-421-6977

Charles Folsom, Working Well / 918-421-8166

House Supervisor / 918-421-0217

Julie Powell / 918-421-3955

You are being requested to bring your own unused N95 mask if you have been issued one. If not one will be made available to you that you must keep in your possession for use in the patient care area.

N95 Testing is limited to those having direct contact with a COVID 19 presumptive/positive patient in an effort to preserve supply as MRHC is trying to be diligent in PPE utilization. Upon employment you should have received a fit mask test if you are a clinical care provider.

In the event any of the following apply to you as a direct care provider you will need to be retested:

- Did not receive the N95 testing
- Do not recall which mask you were tested to
- Have had facial changes such as substantial weight gain/loss, or facial reconstructive surgery that has altered your facial features

Thank you for your understanding. Any questions or concerns please notify any of the above listed at the numbers provided.

Sincerely,
Hospital Incident Command Team
